Collecting data and making graphs.

Choose a question to ask 10 of your friends about. Have them mark their answers. Then you will make a graph and decide what it tells us.

Sample question—Do you usually eat breakfast?

Yes No

Now that you have data, enter it in the graphing computer program

How did the most people answer? A. yes

. yes B. no

How did the least people answer? A. yes B. no

Does this surprise you? A. yes B. no
